PROFESSIONAL SUMMARY

Software engineer with professional experience in full-stack and cross-platform mobile development. Experienced with JavaScript, TypeScript, Python, React, and FastAPI. U.S. Marine Corps veteran with an avionics background, bringing strong analytical, troubleshooting, and cross-functional collaboration skills.

EDUCATION

Bachelor of Science in Information Technology **Expected April 2027**
ECPI University

Associate of Science in Computer and Information Science **2025**
ECPI University

WORK EXPERIENCE

Software Engineer Intern **Dec 2024 – Mar 2025**
TriSphere Apps Remote

- Translated UI/UX designs from iOS to Android, supporting cross-platform consistency and feature development.
- Optimized mobile app metadata through App Store Optimization (ASO) to improve search visibility.

Full Stack Engineer Apprentice **May 2022 – Mar 2023**
UST Xpanxion Remote

- Built customer request and technician assignment forms for a team apartment maintenance ticketing app in React, replacing hardcoded dropdowns with category, urgency, and technician data fetched from a REST API using Axios.
- Developed REST APIs with Node.js, Express, and PostgreSQL in an Agile/Scrum training program.

Aircraft Electrical Systems Technician **Jan 2009 – Nov 2013**
United States Marine Corps

- Diagnosed, maintained, and repaired complex aircraft electrical and avionics systems while meeting strict safety and technical standards.
- Performed systematic troubleshooting of electrical faults in mission-critical aircraft systems.

PROJECTS

ResourceHub | Kotlin · Android Studio · XML

- Built an Android prototype solo in five weeks with ZIP code search, category filters, and favorites.
- Added a budget tracker and stored user data locally with SharedPreferences.

TECHNICAL SKILLS

Frontend | React, TypeScript, JavaScript
Backend | Python, FastAPI, REST APIs
Data | PostgreSQL, SQL
DevOps | Git, Docker, Linux, CI/CD
